

Half-Day Seminar

Aluminium Foil Laminate Products

— Applications & Industry Solutions

Synopsis

Aluminium foil products offer exceptional thermal insulation, vapour barrier, and reflective properties, making them indispensable in modern building and construction. This presentation explores applications in roofing systems, pipe insulation, and industrial facilities across Malaysia and beyond. Drawing on over nine years of hands-on market experience, the speaker covers product selection, installation best practices, performance benchmarks, and growing export demand for Malaysian-manufactured foil laminate solutions — including recent successful entry into the export market.

About the Speaker

Darren Wang is Senior Business Development Manager at Foil Laminate Industries Sdn Bhd, with 24 years of experience in industrial materials sales across Malaysia.

He has led the company's Malaysia market growth since 2015 and spearheaded its entry into the US export market in 2025. He pioneered the company's digital/online marketing strategy in 2020. His earlier career spans petrochemical distribution, industrial pipe systems, and M&E tendering. He holds a Bachelor of Technology (Management) from Universiti Teknologi Malaysia (UTM), graduating in 2001.
