

Half-Day Seminar

Empowering AI-Ready Data Center with Dynamic Infrastructure

Synopsis

AI, cloud, and high-density workloads are redefining data center requirements, making reliability, scalability, and future readiness more critical than ever. Join Panduit Technology Day to explore how resilient intelligent power distribution, and high-density connectivity solutions can help build and future-proof AI-ready data centers. Gain practical insights from industry experts and explore proven infrastructure strategies that enable reliable, scalable, and AI-ready operations.

About the Speaker

Ken Chin
Technical Manager
Panduit

As a Technical Manager at Panduit, Ken brings over 30 years of network infrastructure experience, including 20 years specialising in cable testing and certification. His extensive field experience and practical approach make him a trusted advisor for robust, high-quality network infrastructure solutions.
