

Half-Day Seminar

Unified Networking & Surveillance Solution

Synopsis

Join us for an insightful talk that explores how a single, integrated platform can bring together networking, wireless connectivity, centralized management, CCTV surveillance, and even solar infrastructure monitoring.

This talk will highlight how modern buildings and infrastructure can benefit from:

- Secure and reliable connectivity
- Real-time visibility of systems
- Simplified operations through one unified control point
- Scalable solutions to support future growth

About the Speaker

Charles Loo has 14 years of experience in surveillance and networking systems, specializing in system design, project delivery, and client support. He currently serves as Presales Manager at TPLink Distribution Malaysia Sdn Bhd, where he focuses on integrated networking and ELV solutions such as surveillance, smart intercoms, and access control.
